

# activeformax<sup>®</sup> patented

*Anthropometric mannequins*

## Almost **human**!

**Active Formax<sup>®</sup>** mannequins are special anthropometric tools specifically designed to perform technical test and verifications.

**Active Formax<sup>®</sup>** are available in man, woman, baby, kid and child body shape.

Available with the real distributed weight (on demand), **Active Formax<sup>®</sup>** plays an important role during the design of ergonomic devices like safety car seats, furniture, passenger compartments and cockpits.

FORMAX<sup>®</sup> baby active 55 cm

FORMAX<sup>®</sup> baby active 76 cm

# activeformax<sup>®</sup>

Apparel fit mannequins

patented

**Active Formax<sup>®</sup>** is available in special fire-resistant material and providable with sensors.

The higher degree of articulation (e.g. 90° hips point) towards standard **Formax<sup>®</sup>** makes **Active Formax<sup>®</sup>** the suitable

dummies to execute any kind of test of special fabrics in the wind and rain galleries.

## Formax<sup>®</sup> SuperActive

Reproducing movements and postures of a real human body, **Active and Super-Active Formax<sup>®</sup>** offer a perfect testing solution for the most performing active- and corporate-wear.
